

X-10SW Hand-held Sprayer

Hydro-Force Series

Patent pending

Description

The X-10SW provides the ability to utilize the X-10C Chemical Cylinder with a hand-held sprayer. The X-10SW sprayer has a pressure washer gun-grip handle with replaceable nozzle spray tip. The gun grip handle is furnished with a one-piece high pressure hose and fittings to match the X-10C Chemical Cylinder. High pressure swivel fittings allow easy wand movement and either right- or left-hand operation. All X-10C safety features are retained. There is only one releasable connector that attaches to the X-10C Chemical Cylinder. The X-10SW includes a safety chain to retain the high pressure hose should the connector become disconnected under pressure. The X-10C Chemical Cylinder can be conveniently carried in a washable backpack carrier. The X-10C is easily removed from the carrier for refilling.

Operation

The X-10SW consists of a one-piece sprayer with high pressure hose, X-10C mating connector with safety chain, two interchangeable spray tips, and the washable backpack carrier. Verify that the X-10C Chemical Cylinder valve is closed before

- Gun-grip handle
- Replaceable nozzle tip
- High pressure hose
- Washable backpack

attempting to attach the X-10SW hose. Carefully attach the X-10SW hose and verify that the connector is properly seated. Attach the X-10SW safety chain to the hole in the X-10C pressure gauge shroud. DO NOT open the X-10C Chemical Cylinder valve until you are preparing to use the X-10SW sprayer. Pressurize the sprayer by carefully opening the X-10C Chemical Cylinder valve while observing the built-in pressure gauge. CAUTION: ALWAYS point the X-10SW/X-10C connector away from you and in a safe direction before opening the X-10C valve.

After using the X-10SW, immediately close the X-10C Chemical Cylinder valve to stop further chemical flow to the wand. After closing the X-10C valve, the handheld wand must be sprayed in a safe direction to release the remaining hose pressure. The pepper spray residue in the hose may drip if not contained.

Warnings

The X-10SW Hand Held Sprayer must not be used by any officer until that officer has received training in X-10SW operation and the officer has also test fired the X-10SW.

Gun-grip sprayer with interchangeable nozzle tips

IMPORTANT - The X-10SW is a high pressure gas less-lethal weapon. Careful handling and proper training is required. The X-10SW high pressure hose contains Oleoresin Capsicum (pepper spray) under high pressure when the X-10C valve is opened. The pressure **MUST BE RELEASED BEFORE** the hose is disconnected. When the X-10SW hose is disconnected from the X-10C Chemical Cylinder, be careful that no pepper spray chemical residue drips from the high pressure hose connector.
